

North Texas RFID Group Activities

An RFID FRIDAY info session was held on June 5, 2009. A few photos from the event illustrate the connections being made and information on RFID opportunities being discussed.

Gracious host: MC Tammy Stewart of RFIDJOBING.com welcomed attendees to the June 5 RFID FRIDAY lunch at The Italian Club of Dallas. She also thanked some of the event partners and supporters, including the IEEE Dallas section and the C4iSN center at UTD.

Luncheon preparations:

Hoping for an extra helping of pasta, **Rob Sabella**, president & CEO of OTA Training, which organizes the RFID FRIDAY and 3rd Thursday HAPPY HOUR events for the North Texas RFID Group, chats with Master Chef Tomasso Lintingi at The Italian Club of Dallas. Attendees at the June 5th lunch enjoyed a delicious meal of lentil soup, salad with raspberry vinaigrette dressing, penne bolognese and a chicken or Mahi Mahi entrée for just \$15.

Featured speaker:
Jim Ferguson of DataSpan, who talked about the implementation of RFID for asset tracking in Data Centers, attracted a good crowd. More than 25 RFID professionals attended the get-together, the first of these informal lunches to include an expert speaker on a topic of interest to the RFID community in North Texas.

Networking at work:

After the lunch, **Joseph Clear** of OTA Training, high tech product management & marketing executive **Pete Poorman**, and **Scott Mauldin** of TransMit RFID, linked up to discuss the speaker's presentation, their own recent RFID activities, and what they see happening on the RFID front in North Texas.
